

ALL-AROUND GREAT PRODUCTS

HIGHLINE

 **PLANAM**
Fashion for your profession

CASUALLY ON THE MOVE

The most colours, the most articles, the most sizes for the most professions – this is what distinguishes our PLANAM Highline range. Here, men and women will find everything that everyday working life demands in terms of well-equipped clothing.

The distinguishing feature of Highline: the near-limitless variety of the range. Whatever demands you and your job place on the functionality and design of workwear, in our collection, you will find a wide selection of suitable models that meet your requirements – in every season, in every weather condition and for (almost) all industries.

PRETTY COOL

No snagging:
the front zip is covered
by a flap

Thigh pocket with flap
Keeps stored utensils clean

Contrasting applications
For a sporty modern
appearance

Anyone who appreciates the casual look of workwear is well-advised to go for the PLANAM Highline collection. The modern design provides that wow effect and, at the same time, the range is equipped with practical features for everyday working life.

The collection leaves nothing to be desired with its variety of colours – every taste is catered for. In addition, our models are robust, comfortable to wear, durable and gentle on sensitive skin surfaces. The latter is ensured by concealed zips, press studs and pockets covered with flaps.

Scratch-free surface
Flaps conceal metallic garment details such as press studs and zips, so that no scratches can occur on contact with other surfaces.

Inside button
In addition, inside buttons on the waistband help keep the trousers scratch-free.

Sufficient storage space
Space for work utensils
thanks to practical pockets

BE IT D.I.Y. OR A TRADE- MAN'S DAY, OUR CLOTHES ARE RIGHT AT HOME

Always the right design
For example, classic blue for plumbers

Whether for the plumber, the carpenter or the passionate do-it-yourselfer – everyone looking for high-quality, practical and comfortable workwear will find what they are looking for in the Highline range.

The variety of colour combinations in our Highline collection appeals to every industry. White clothes for painters? We've got it! Grey models for tilers? For sure! – Right through to brown-tone designs for carpenters. The practical features of the range actively support the work being done, so that, for example, thanks to the double ruler pockets, the folding rule is always at hand.

STANDARDS & CERTIFICATION

DIN EN 14404 KNEE PROTECTION FOR WORKERS KNEELING DOWN

Working in a kneeling position creates constant pressure on the knee. Knee protection is designed to distribute the forces produced evenly across it. In addition to this, it is designed to prevent injuries or damage caused by hard surfaces, small stones or similar objects lying on the ground.

Knee protection is subdivided into 4 types:

- Type 1: Knee protection that is separate from clothing and fastened to the leg.
- Type 2: Pads inserted into pockets on trouser legs or permanently attached to the trousers.
- Type 3: Equipment that is not attached to the body.
- Type 4: Knee protection forming part of a unit with additional functions.

In addition to this, there are three performance classifications:

- Level 0: No protection against punctures.
- Level 1: The knee protection is suitable for even ground where there is no risk of objects over 1 cm in height.
- Level 2: The knee protection is for use in challenging conditions, such as for example when kneeling on stones in mines or quarries.

The PLANAM knee pad product no. 9901027 is certified as Type 2, Level 1/ Level 0 knee protection. This certification only applies in conjunction with PLANAM trousers, dungarees or overalls and cannot be transferred to other products.

THE OEKO-TEX® STANDARD 100

The OEKO-TEX® Standard 100 is an independent testing and certification system for raw, intermediate and end products for textiles from all stages of processing. Examples of certifiable articles are raw and dyed/refined yarns, raw and dyed/refined woven and knitted fabrics, ready-made articles (garments of all types, home textiles, bedding, terry towelling, toys made of textiles and many others).

Tests for harmful substances cover:

- + substances banned by law
- + substances regulated by law
- + chemicals that are known to be potentially harmful to health (but are not yet regulated by law)
- + healthcare parameters in their entirety, the requirements go well beyond existing national legislation.

Why OEKO-TEX®?

The OEKO-TEX® Standard 100 was developed in the early 1990s as a response to the need of consumers and the general public for textiles that do not pose a risk to health. Negative headlines such as "Poisons in textiles" were widespread at the time, labelling all chemicals used in the production of textiles as negative and harmful to health.

Yet the demands made of modern textile products cannot be met without using certain chemical substances. Fashionable colours, easy care, long life and many other functional properties are demanded of textiles today and are, to some extent, and depending on their intended use (e.g. for professional and protective clothing), quite indispensable.

UV PROTECTIVE CLOTHING WITH INTEGRATED SUN PROTECTION

The largest organ of the human body is the skin, and it is exposed to great danger in summer. UV rays from the sun can increase the risk of skin cancer. Standard textiles are radiolucent, providing insufficient protection.

PLANAM's UV-protective clothing gives guaranteed certified safety. Awarded UV protection certificates "PROTECT 80" and "PROTECT 40", this range guarantees maximum prevention. Just like for sunscreens, the figure indicates the protection factor for spending longer in the sun safely. Our PLANAM models allow the wearer to remain in the sun 80 or 40 times longer than those without protection. With their integrated sun protection factor, the finished garments provide the skin with optimum protection. Those with sensitive skin can stay in the sun longer without having to cover themselves in sunscreen. It is important to know the individual skin type in order to determine the individual's protection time (length of possible exposure to the sun without risk of skin damage). The UV protection factor specified (e. g. Protect 80) gives the factor by which the individual's protection time can be extended just by wearing these textiles.

PERSONALISATION IN NEXT TO NO TIME

Workwear is advertising space for your logo and acts like a business card for your company. Personalisation ensures a recognisable and positive company image. Our finishing service brings your message to a wider audience in a customised, professional and fast manner.

PLANAM Individual specialises in personalising your workwear. From reflective appliqué to transfer prints and embroidery, we offer multiple personalisation options of the highest quality. Whether you need small quantities for handicraft businesses or large runs for industrial companies – our team of experts are on hand to provide you with personal advice and detailed information about the optimal finishing types for our products. This also includes finishing options with methods specifically adapted to the certification requirements of certified protective clothing.
